

G-M Series Granular Ice Machine

G-M Series is the latest type of granular ice making machine. The operating systems use advanced computers to automatically control and reveal the whole ice making process which makes for easy and convenient operation.

The machine will be running smoothly, hard to break and obviously it is very low maintenance as well.

The indication can be showed on the PC board if there something goes wrong and the machine will be turned of itself and the instruction warning lights will be on. Such as:

1. Ice Full
2. Lack of Water
3. Wrong Rotating Direction
4. Evap/Cond Temperature Too High etc.

So it will make your life absolutely easier to judge the failure of operation

G-SC Series Granular Ice Machine

G-M Series Granular Ice Machine

Model	Max prod	Condensor	Cool capacity	Supply pipe interface	Drainpipe diameter	Dimensions (LxBxH)	Weight	Price
G70SC	70kg	Air-cooled	250W	3/4" GAS	21mm	585x615x1135	66kg	
G100SC	100kg	Air-cooled	380W	3/4" GAS	21mm	585x615x1135	68kg	
G130SC	130kg	Air-cooled	480W	3/4" GAS	21mm	585x615x1135	70kg	
G350M	350kg	Air-cooled	1060W	3/4" GAS	21mm	665x540x695	88kg	
G550M	550kg	Air-cooled	1960W	3/4" GAS	21mm	665x540x835	110kg
